PRODUCT DEVELOPMENT · ASSIGNMENT DELIVERABLE

Internship & Job Hunter Full Pipeline

Target Users: College Students (MSOT) **Core Focus:** Remote, Flexible, Part-Time Internships **Artifact:** MVP Scope & Low-Fidelity Wireframes

1. One-Line MVP Scope Statement

> **Scope Statement:** "My MVP lets college students discover and track verified remote, part-time internships matching their class schedules so that they gain career experience without compromising their studies. It will not include employer job-posting accounts, in-app recruiter messaging, or automated video interview prep."

2. User Journey (6 Steps)

1. **Trigger & Problem Recognition**
   Tanmay (MSOT student) has morning classes until 1 PM. He searches for a graphic design/marketing internship, but standard portals only show full-time, offline roles requiring 40 hrs/week that clash with college.

2. **Onboarding & Availability Setup**
   He signs up and sets non-negotiable boundaries: `Remote Only`, `Max 15 hrs/week`, and blocks out his morning lecture schedule on an interactive availability calendar.

3. **Curated & Filtered Discovery**
   The system displays a curated feed of strictly verified part-time, remote opportunities with upfront hourly commitments matching his free afternoon blocks.

4. **Schedule & Role Verification**
   He inspects a design role card and reviews the *Schedule Compatibility Breakdown*, verifying asynchronous daily deliverables with zero mandatory offline hours.

5. **Tailored Application**
   He clicks apply with a tailored cover snippet highlighting his Figma portfolio and specific weekly afternoon availability.

6. **Pipeline Tracking & Follow-up**
   The role is automatically saved to his Kanban tracker in the `Applied` column, with an automated 5-day follow-up reminder, eliminating the silence and anxiety of ghosting.

3. Feature Brainstorm (18 Features) & MoSCoW Prioritization

Must-Have (Core MVP — 4 Features Linked to Evidence)

FEATURE	DESCRIPTION	DIRECT EVIDENCE FROM INTERVIEW (TANMAY)
1. Strict Remote & Part-Time Filter	Hard filter that completely hides 40h/week full-time and offline roles.	*"They were full time and they expected me to work with them in offline mode and not work from home... It should be part time."*
2. College Schedule Matcher	Students input lecture hours so roles requiring conflicting hours are excluded or flagged.	*"The hardest part was to find an internship role that has my interest and can go parallel with my college."*
3. Upfront Time-Commitment Card	Displays weekly hours, daily time expectations, and stipend clearly on the outer card before clicking.	*"If I could wave a magic wand I would wish for our internship role that has flexible workers."*
4. Basic Application Tracker (CRM)	Simple pipeline tracking application statuses from submission to follow-up.	*"...across that whole journey from finding the role to applying to waiting for feedback..."*

SHOULD-HAVE (V2 — 5 FEATURES)

- **5. Automated Follow-Up Reminders:** Alerts after 5-7 days of silence.
- **6. In-Browser Form Auto-Filler:** Extension for common form fields.
- **7. AI Resume Match Score:** Percentage fit for portfolio vs JD.
- **8. Minimum Stipend Filter:** Filter out unpaid internships.
- **9. Direct Email Generator:** 3-sentence outreach note to hiring leads.

COULD-HAVE (NICE EXTRAS — 5 FEATURES)

- **10. Telegram/WhatsApp Alerts:** Ping when a high-match role appears.
- **11. Exam Blackout Mode:** Pauses outreach during exam weeks.
- **12. Portfolio Preview Tile:** Embedded Behance/Figma link preview.
- **13. Drag-and-Drop Kanban:** Interactive status board.
- **14. Interview Prep Sheet:** 5 role-specific prep questions.

WON'T-HAVE NOW (PARKED ON PURPOSE — 4 FEATURES)

- **15. Employer Job-Posting Portal:** Aggregating public listings first.
- **16. AI Mock Video Interviews:** Out of scope for early validation.
- **17. In-App Direct Recruiter Chat:** Redirect to standard email/portal.
- **18. Stipend Negotiation Simulator:** Not needed for entry internships.

4. Photo of Paper Sketches

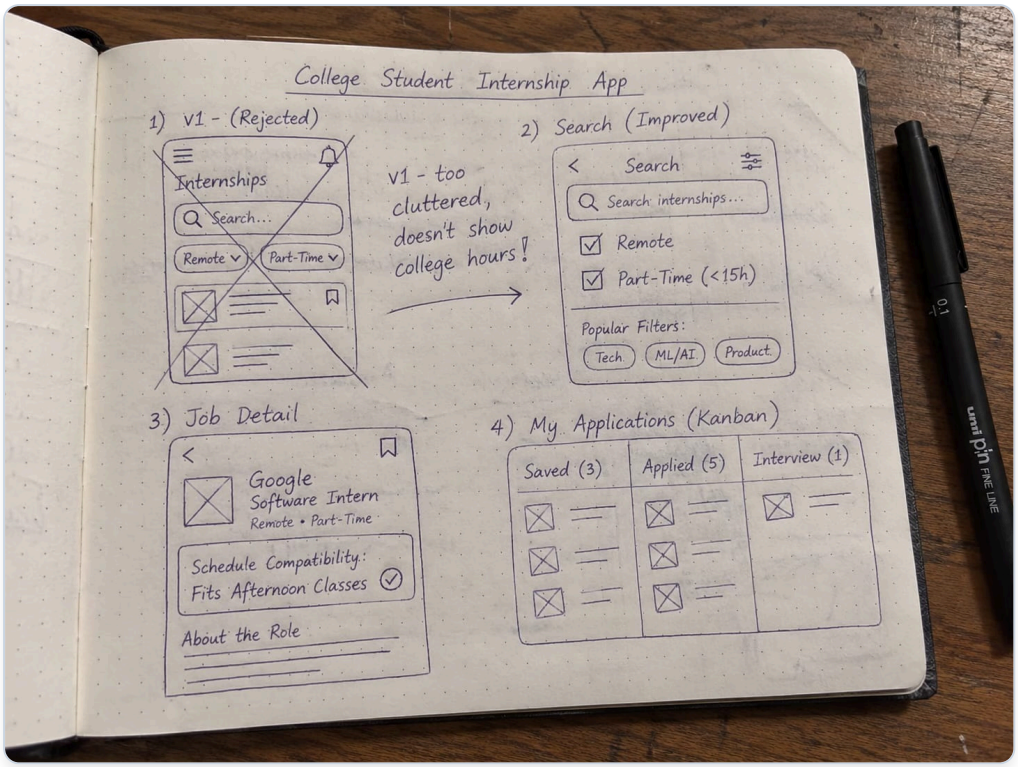

Figure 1: Authentic hand-drawn low-fidelity wireframe sketches on dotted-grid sketchbook (Named: photo.jpg / photo.heic).

> **Sketch Iteration & Design Rationale:**
>
> - **v1 (Discarded & Crossed Out):** Initially designed with a crowded search interface and multi-nested dropdowns where 'part-time' and 'remote' filters were buried. Marked with an 'X' and scrapped.
> - **v2 (Redrawn & Approved):** Rebuilt with immediate toggle pills for `[Remote Only]` and `[Part-Time (<15h/wk)]`, followed by an upfront schedule compatibility inspection panel and a 3-column application tracker.

5. Clickable Figma Wireframe Link

Interactive Prototype URL:
https://www.figma.com/design/cUSqziKBG0hMgspxI9M1vs

Included Screen Flows: (1) Availability & Constraint Setup · (2) Curated Match Feed · (3) Schedule Breakdown Detail View · (4) Application Tracker CRM

6. Notes from 2 Wireframe Usability Checks

User Check 1: Tanmay (Marketing & Graphic Design Student)

Task Given: *"Find a graphic design role requiring under 15 hours a week and save it to your tracking list."*

Where they got confused: The weekly hourly requirement was originally hidden inside the expanded job details panel, requiring the user to click into every card individually to check for schedule conflicts.

Change Made: Added an immediate `10–12 hrs/week · Flexible Hours` badge directly on the front-facing card in the discovery feed.

User Check 2: Honeyvilla (Peer Student)

Task Given: *"Click 'Apply' on a role and check where the application is stored."*

Where they got confused: After hitting the 'Apply' button, the screen stayed on the job detail page without any confirmation, leaving the user uncertain whether the application succeeded.

Change Made: Added an instant confirmation toast banner and redirected the status badge to `Applied: Follow-up in 5 days` on the Kanban board.
